Covers concentrations up to 100%

Product characteristics

Physical form of product	Liquid
--------------------------	--------

Other operational conditions of use affecting environmental exposure

Type	Continuous
Emission days	200

Risk management measures

Technical onsite conditions and measures to reduce or limit discharges, air emissions	Carefully handle the substance to minimise releases Maximise waste water re-use Prevent environmental discharge consistent with regulatory requirements
Additional good practice advice beyond the REACH Chemical Safety Report	Good housekeeping- e.g. inspection procedures will ensure that there are no leaks to soil Clear up spills immediately and dispose of waste safely

Control measures to prevent releases

Water	Ensure all waste water is collected and treated via a WWTP
-------	--

Conditions and measures related to external recovery of waste

Method	External recovery and recycling of waste should comply with applicable local and/or national regulations
--------	--

Control of worker exposure	
Covers concentrations up to	100%
Physical form of product	Liquid
Use frequency	Covers daily exposures up to 8 hours (unless stated differently).
Technical conditions and measures to control dispersion from source towards the worker	Consider technical advances and process upgrades (including automation) for the elimination of releases. Minimize exposure using measures such as closed systems, dedicated facilities and suitable general/local exhaust ventilation. Drain down systems and clear transfer lines prior to breaking containment. Clean/flush equipment, where possible, prior to maintenance. there is potential for exposure: restrict access to authorized persons; provide specific activity training to operators to minimize exposures; wear suitable gloves and coveralls to prevent skin contamination; wear respiratory protection when its use is identified for certain contributing scenarios; clear up spills immediately and dispose of wastes safely. safe systems of work or equivalent arrangements are in place to manage risks. Regularly inspect, test and maintain all control measures. the need for risk based health surveillance
Conditions and measures related to personal protection, hygiene and health evaluation	See Section 8 for information on appropriate personal protective equipment Wear suitable gloves (tested to EN 374), coverall and eye protection
Organisational measures to prevent /limit releases, dispersion and exposure	Ensure operatives are trained to minimise exposures Automate activity where possible Use long handled tools where possible Other protection measures such as segregation of activity, minimisation of personnel, respiratory protection, impervious suits and face shields should also be considered for high dispersion activities which are likely to lead to substantial aerosol or vapour release, e.g. spraying
Additional good practice advice beyond the REACH Chemical Safety Report	Assumes a good basic standard of occupational hygiene is implemented

Section 3 - Exposure estimation

Environmental release category(ies) - ERC1 - Manufacture of substances

Predicted No Effect Concentration (PNEC)

Remarks Substance will dissociate upon contact with water; the only effect is the pH effect, therefore after passing through the STP exposure is considered negligible and with no risk

Derived No Effect Level (DNEL):

Worker - inhalative, long-term - local 1 mg/m³

Calculation method The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated

Process category(ies)	Exposure route	predicted exposure level	Risk characterisation ratio (RCR)
	Worker - inhalative, long-term - local	0.14 - 0.33 mg/m ³	0.14 - 0.33

Section 4 - Guidance to check compliance with the exposure scenario

Where other risk management measures/operational conditions are adopted, then users should ensure that risks are managed to at

least equivalent levels.

Other operational conditions of use affecting environmental exposure

Type	Continuous
Emission days	200

Risk management measures

Technical onsite conditions and measures to reduce or limit discharges, air emissions	Carefully handle the substance to minimise releases Maximise waste water re-use Prevent environmental discharge consistent with regulatory requirements
Additional good practice advice beyond the REACH Chemical Safety Report	Good housekeeping- e.g. inspection procedures will ensure that there are no leaks to soil Clear up spills immediately and dispose of waste safely

Control measures to prevent releases

Water	Ensure all waste water is collected and treated via a WWTP
-------	--

Conditions and measures related to external recovery of waste

Method	External recovery and recycling of waste should comply with applicable local and/or national regulations
--------	--

Control of worker exposure

Covers concentrations up to	100%
Physical form of product	Liquid or Solid, low dustiness
Use frequency	Covers daily exposures up to 8 hours (unless stated differently).
Technical conditions and measures to control dispersion from source towards the worker	Consider technical advances and process upgrades (including automation) for the elimination of releases. Minimize exposure using measures such as closed systems, dedicated facilities and suitable general/local exhaust ventilation. Drain down systems and clear transfer lines prior to breaking containment. Clean/flush equipment, where possible, prior to maintenance. there is potential for exposure: restrict access to authorized persons; provide specific activity training to operators to minimize exposures; wear suitable gloves and coveralls to prevent skin contamination; wear respiratory protection when its use is identified for certain contributing scenarios; clear up spills immediately and dispose of wastes safely. safe systems of work or equivalent arrangements are in place to manage risks. Regularly inspect, test and maintain all control measures. the need for risk based health surveillance
Conditions and measures related to personal protection, hygiene and health evaluation	See Section 8 for information on appropriate personal protective equipment Wear suitable gloves (tested to EN 374), coverall and eye protection
Organisational measures to prevent /limit releases, dispersion and exposure	Ensure operatives are trained to minimise exposures Automate activity where possible Use long handled tools where possible Other protection measures such as segregation of activity, minimisation of personnel, respiratory protection, impervious suits and face shields should also be considered for high dispersion activities which are likely to lead to substantial aerosol or vapour release, e.g. spraying
Additional good practice advice beyond the REACH Chemical Safety Report	Assumes a good basic standard of occupational hygiene is implemented
